1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A) Claims 1-5 include "means-plus-function" language and thus are assumed to invoke a Section 112-6 interpretation; i.e., that the "means" are to be interpreted as being limited to the disclosed corresponding structure (and equivalents thereof). However, turning to the specification, the examiner is unable to locate the required corresponding structure for the recited "means" and, as such, the claims are indefinite.

B) Line 2 of claim 6 appears to be misdescriptive because, as indicated in the specification (note lines 7-9 on page 8), it is the computer/apparatus that executes the process by executing the program. Clarification is needed.

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-4 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The specification:

1) Seems to indicate that the entire disclosed system/"apparatus" may be implemented with computer software [e.g., @ paragraph 0021 on page 8]; and

2) Explicitly indicates the controller (12) of Figure 4 can be implemented with computer software by software [i.e., @ paragraph 0036 on page 14].

As such, the recited "apparatus" of claims 1-4 appear to encompass a computer program per se; particularly when the means-plus-function language is read in light of the specification. As such, claims 1-4 are directed to non-statutory subject matter.

Clarification should be made by limiting the claims to the described "hardware" embodiment.

5. Claims 1-6 avoid the art of record.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **DAVID E. HARVEY** whose telephone number is (571) 272-7345. The examiner can normally be reached on M-F from 6:00AM to 3PM.
